

Public Health
England

Take one *'high churn'* Prison

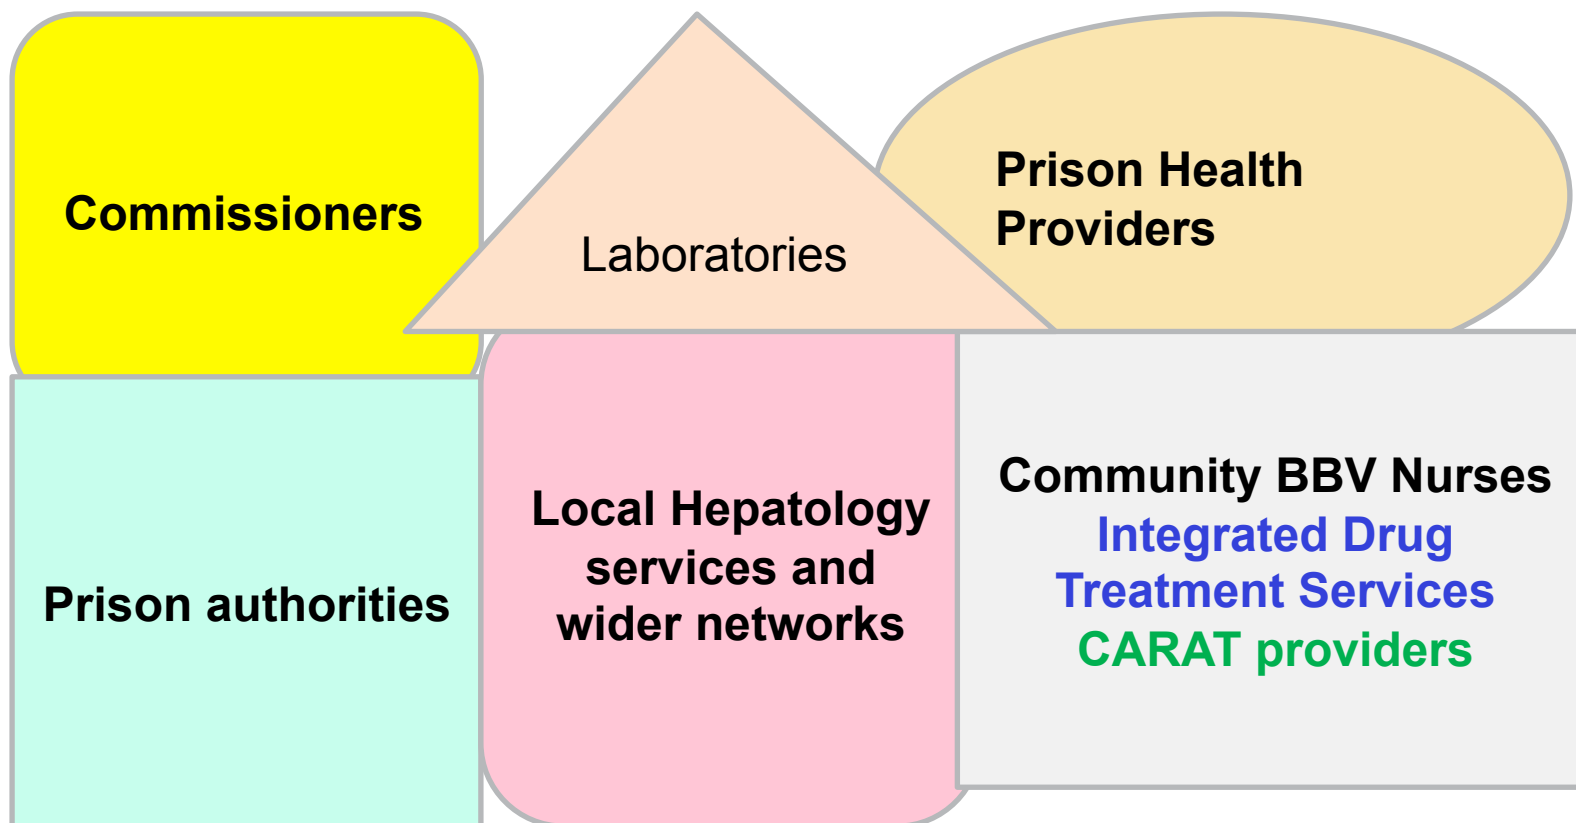

Step 1 - Agree what is needed

- Increased testing.
- **Practical** and **Timely** Assessment of Hepatitis C cases identified.
- Patient centred care planning.
- Focus on keeping ALL cases on a treatment pathway.

Step 2 - Identify key stakeholders

Public Health
England

Step 3 - Rapid testing, assessment and care pathway development

Routine, opt-out testing.

Identify and use rapid clinical assessment methods.

Develop a nurse-led hepatology in-reach service.

Identify those at immediate risk for treatment referral.

Plan for continuing care on release or transfer from the testing prison.

Get started.....
