Addressing blood-borne viruses across London: PHE Update

Emily Phipps

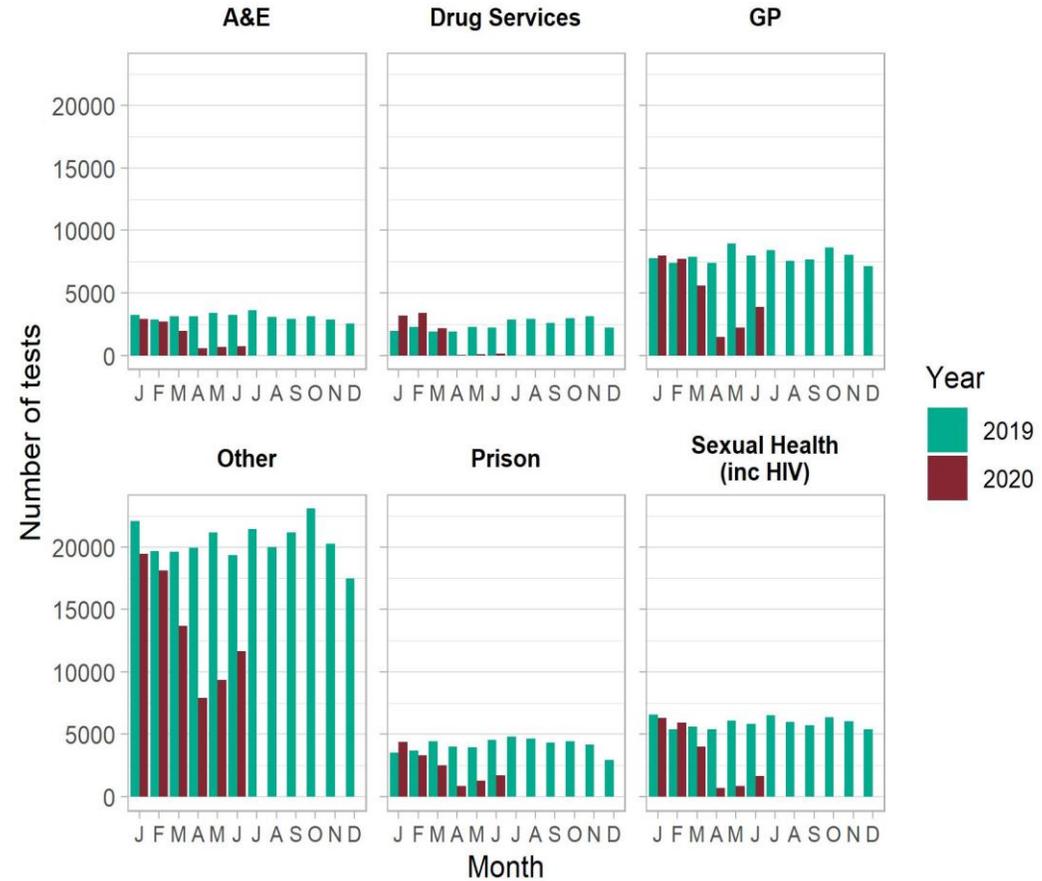

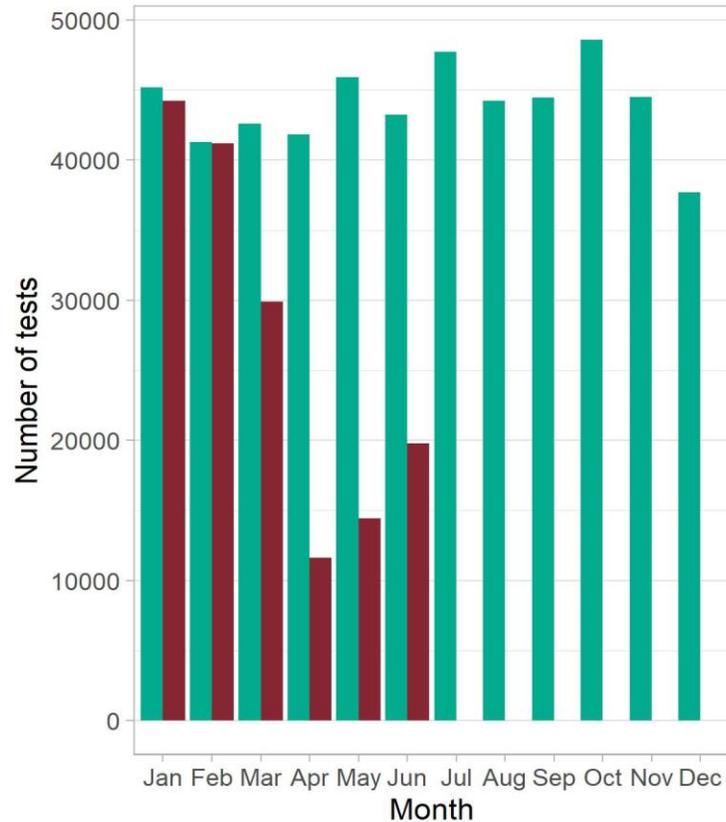

Today's session

- Describe the impact of the COVID-19 pandemic on HCV elimination and opportunities for recovery
- Update on the HCV dashboard & service care pathway
- Explore opportunities to enhance focus on prevention and harm reduction

Testing for hepatitis C has fallen in all settings

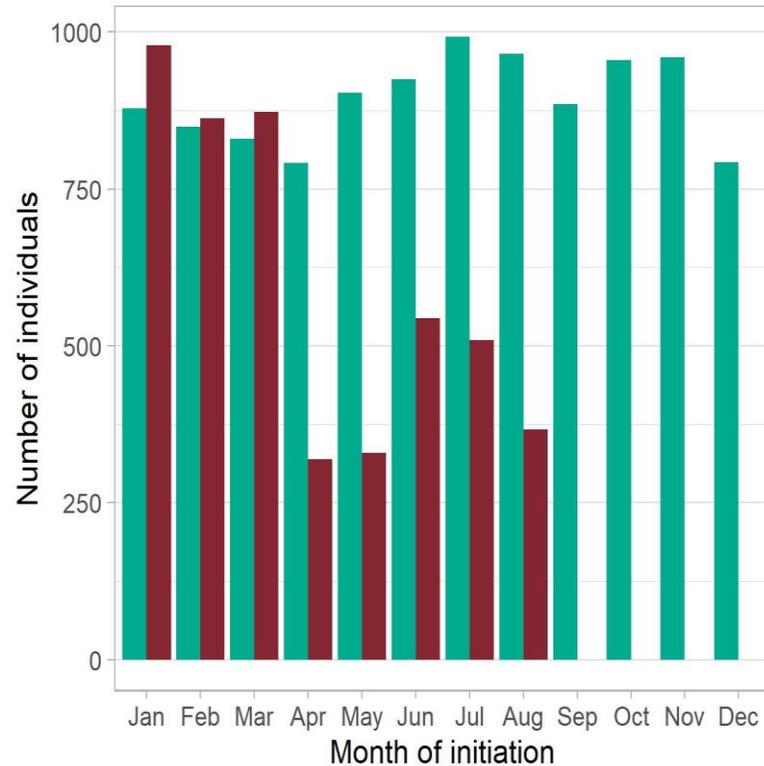

Source: SSBBV

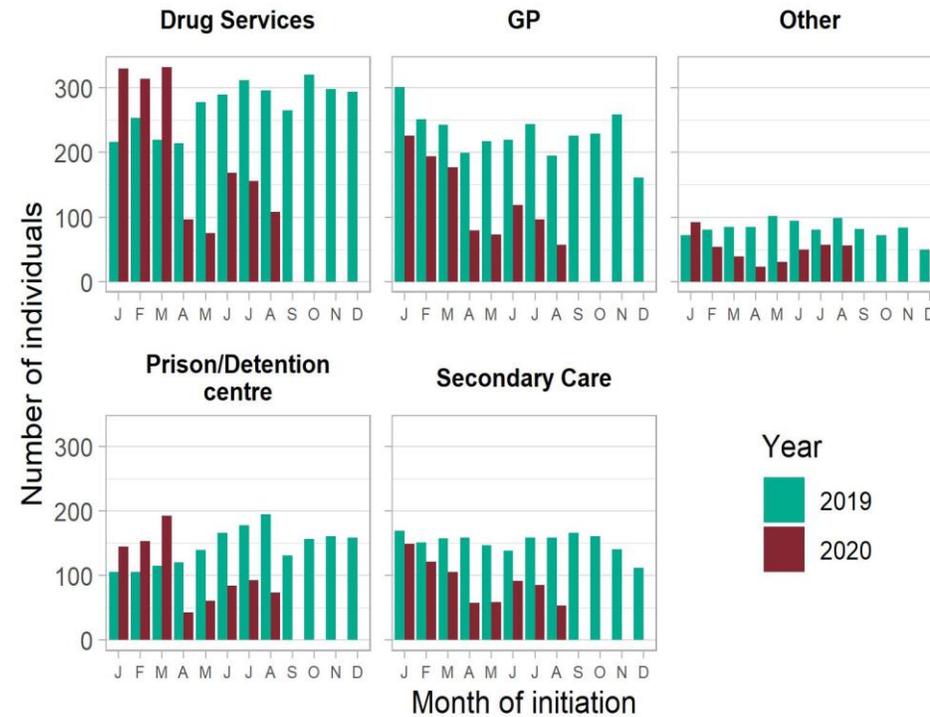

Hepatitis C treatment initiations have fallen

Treatment –number of initiations

Treatment –source of referral

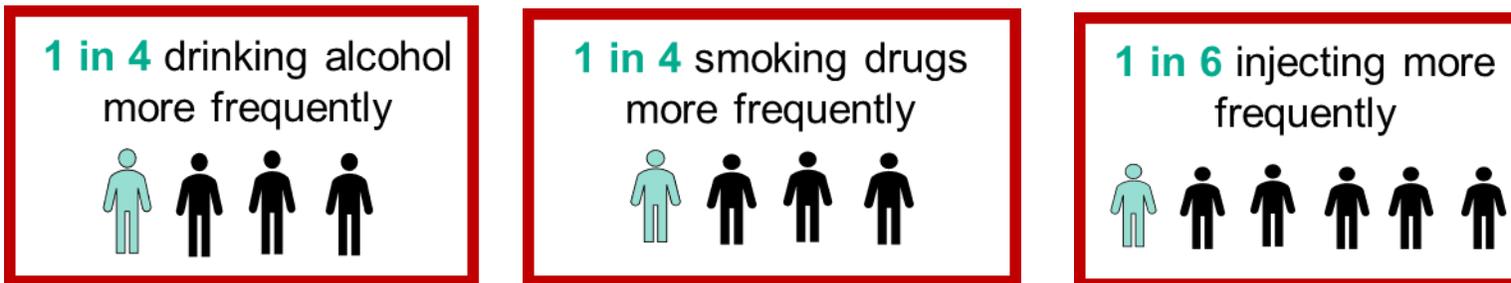

Source: HCV treatment monitoring

In 2020 PWID reported **difficulties** in **accessing services** including:

PWID reported **changes** in their **risk behaviour**:

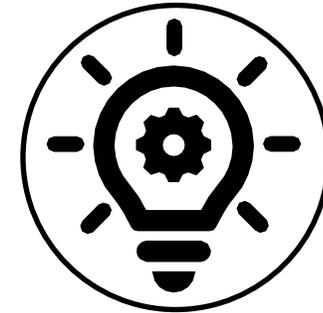

Getting back on track: the 'new normal'

A renewed focus
on prevention

Evaluating
innovative
delivery models

Optimising data
& intelligence

Whole system collaboration

Public Health England

HCV ODN Testing and treatment dashboard

ODNs:

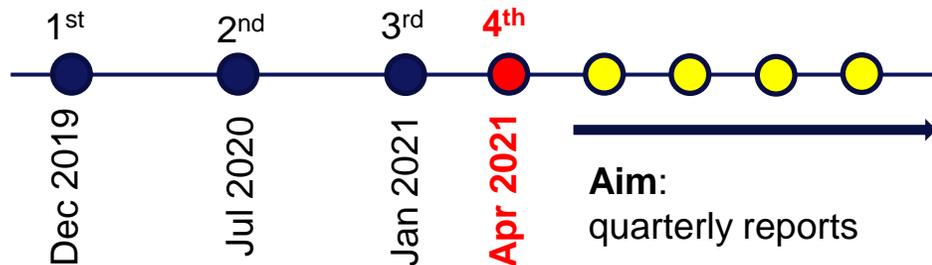

22 Operational Delivery Networks (ODNs)

HCV ODN Dashboard

Timeline:

Advisory Group Meeting:
Next 4th March 2021
Feedback and development

Development and Improvement:

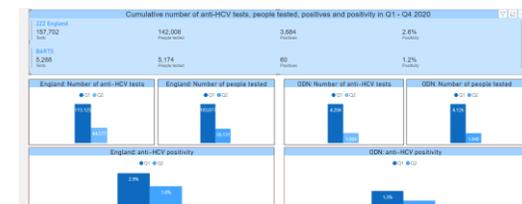

Service dashboards i.e. drug services

Regional dashboards i.e. Pan-London dashboard

Additional geographies within ODNs i.e. CCG

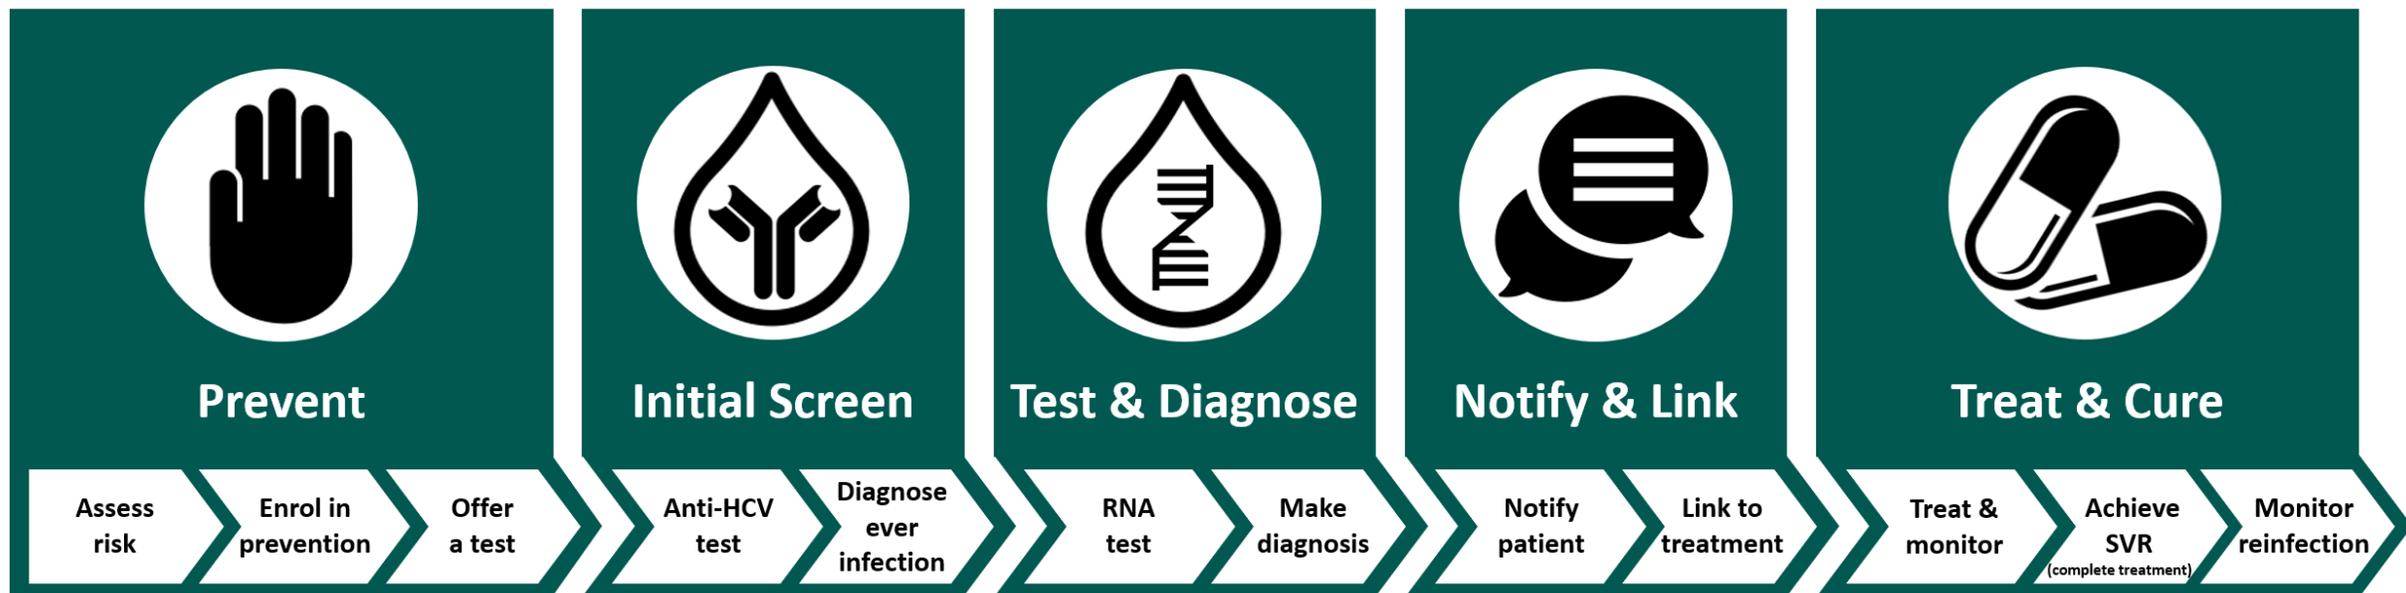

New format i.e. additional visualisations

HCV Care Pathway

Support the elimination of HCV as a public health problem, through a collaborative process between PHE, NHS England, commissioners and providers that explores variations in local populations identified through the service care pathway.

Planned Date	Activity
March 2021	Data Preparation
April 2021	Pilot Workshop in Nottingham ODN Refinements and improvements
May 2021	Refinements and improvements
June 2021 onwards	Roll out and trial in other ODNs

A joined up approach to prevention & harm reduction
