

HCV in London – 2020-21 to 2021-22

February 2021

NHS England and NHS Improvement

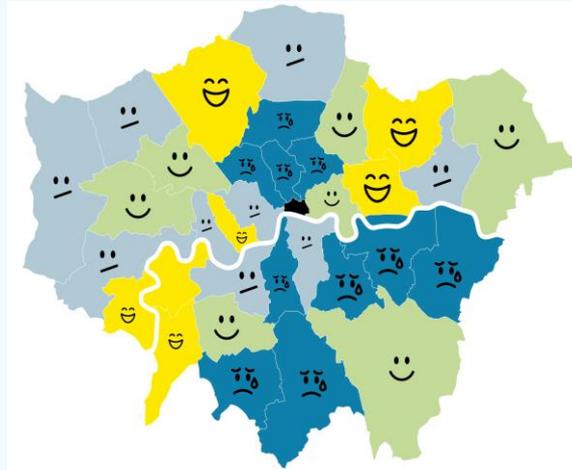

Case Finding

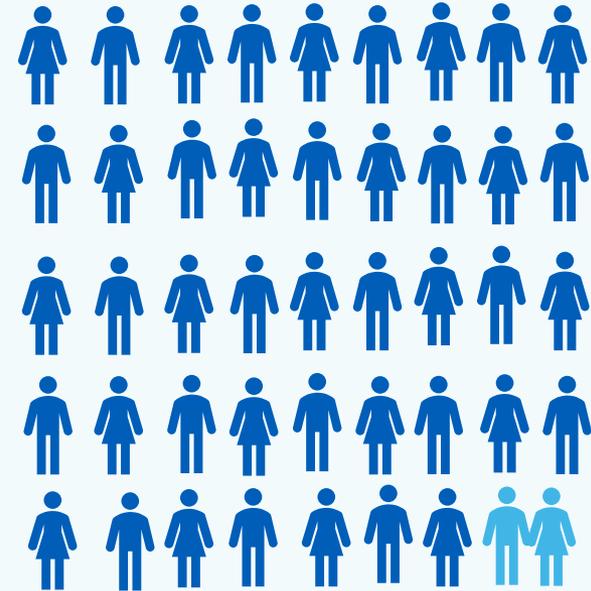

1 Identifying patients is 'easy'
(Hospital waiting lists)

2 Case finding is much harder
Mixture of cleared, partially clear,
and areas of unmet need

3 Maintenance or business as usual

THE START
people to find

THE MIDDLE
Early middle ← → *Late middle*

THE END
maintenance / BAU

Why are London ODNs different?

- Effort vs return
- Progress and numbers of treatment already found
- Shared responsibility
 - One, shared London 'run rate' – lower to take account of progress made
 - EIs for the ODNs, as before
 - Additional responsibilities for National Hep C Elimination Team and NHS London (ICS, Primary Care, Registry etc.)
 - Some specialist pan-London work – harnessing experience and expertise in one ODN and sharing it across others (ED Testing, Addiction Services, Prisons etc.)
